Police Sniper 4 – Long-Range

“To Fire a Perfect Shot at Long Range”

In PS4, the student is taught to apply the previously established skills to long range shooting. Long- range marksmanship is important for snipers with rural/regional jurisdiction, airport duties and/or responsibility for counter-sniper operations. The student is taught the techniques to be successful at ranges out to 600 meters. Special attention is paid to the various techniques required to accurately 'read' the wind. The skills required as a spotter/observer are taught and practiced in a closely coached environment.

- The Role of the Spotter (equipment, skills, responsibilities)
- Elevation & Windage (theory, methods, etc.)
- Reading the Wind (facts & techniques)
- Range Practice at 200 – 600 meters
 - Establishing holdovers
 - Shooting using holdovers
 - Shooting using sight elevations
 - Centering the group for the conditions
 - Reading the wind and adjusting windage
 - Observing swirl and splash
- Practices with moving targets, snaps, agony snaps, rapid follow up targets, as well as fire and movement, from 200 to 600 meters
- Practical position exercises at 200 to 600 meters
- Falling Plates - Firing at long range with stress

Offered in 2018:

10-14 September 2018

\$1300.00 plus HST
